

## Ejercicios de fracciones 1

Debes practicar la suma y resta de fracciones si tuviste desempeño bajo el segundo periodo, para poder avanzar en el tercer periodo.

$$1a. 14 - \frac{1}{10} =$$

$$1b. \frac{4}{11} - \frac{9}{6} =$$

$$2a. \frac{9}{5} + \frac{1}{4} =$$

$$2b. 12\frac{2}{11} + \frac{11}{3} =$$

$$3a. \frac{2}{12} + \frac{5}{3} =$$

$$3b. \frac{9}{10} - \frac{10}{2} =$$

$$4a. 8 + \frac{8}{9} =$$

$$4b. \frac{8}{12} - \frac{3}{4} =$$

$$5a. 19\frac{1}{4} - \frac{6}{11} =$$

$$5b. 5 - \frac{5}{8} =$$

$$6a. \frac{1}{8} + 2\frac{6}{12} =$$

$$6b. \frac{4}{11} - 4\frac{1}{3} =$$

$$7a. 18\frac{9}{11} - \frac{12}{8} =$$

$$7b. 13 - \frac{2}{1} =$$

$$8a. \frac{9}{11} + 15 =$$

$$8b. \frac{3}{2} - 18 =$$

$$9a. \frac{5}{11} - \frac{8}{4} =$$

$$9b. \frac{3}{12} - \frac{9}{6} =$$

$$10a. \underline{3} + 8\underline{2} =$$

$$10b. 6 - \underline{11} =$$

$$7 \quad 10$$

$$10$$

$$11a. \frac{1}{11} + \frac{5}{1} =$$

$$11b. 13\frac{1}{8} + \frac{1}{8} =$$

$$12a. \frac{3}{7} + 7 =$$

$$12b. \frac{1}{4} - 16\frac{3}{8} =$$

$$13a. \frac{4}{2} - 5\frac{2}{4} =$$

$$13b. 17 - \frac{5}{12} =$$

$$14a. \frac{11}{12} - 4\frac{7}{8} =$$

$$14b. \frac{10}{4} - 11\frac{8}{9} =$$

$$15a. 1 + \frac{4}{11} =$$

$$15b. 17\frac{10}{11} - \frac{5}{11} =$$

$$16a. \frac{11}{5} + 13 =$$

$$16b. \frac{3}{11} - 9\frac{6}{9} =$$

$$17a. 12 + \frac{8}{10} =$$

$$17b. \frac{6}{10} - 14\frac{3}{9} =$$

$$18a. \frac{9}{10} + 14 =$$

$$18b. 11 + \frac{9}{3} =$$

$$19a. \frac{1}{9} + \frac{3}{4} =$$

$$19b. \frac{3}{8} - \frac{10}{2} =$$

$$20a. 7\frac{1}{5} - \frac{1}{8} =$$

$$20b. 7\frac{1}{8} - \frac{3}{7} =$$
